VendorFlow - Product Requirements Document (PRD)

1. Product Overview

VendorFlow is a B2B SaaS platform designed to streamline vendor onboarding for marketplaces and hyperlocal platforms. It enables vendors to upload documents once and reuse verified profiles across multiple platforms.

2. Problem Statement

1. Vendors repeatedly upload documents across platforms
2. Verification is slow and manual
3. High drop-off during onboarding
4. Operational inefficiencies for platforms

3. Solution

A unified onboarding system where vendors upload documents once, get verified, and reuse their profile across platforms via secure links and APIs.

4. Target Users

1. Hyperlocal delivery startups
2. Marketplace platforms
3. ONDC sellers
4. Small vendors (kirana, bakery, grocery)

5. Core Features

Vendor Side

1. Phone OTP login
2. Document upload (GST, PAN, bank)
3. Verification status tracking
4. Reusable vendor profile link

Platform Side

1. Admin dashboard
2. Vendor management
3. Approve/reject workflows
4. Export/download vendor data

System Features

1. API for vendor data sharing
2. Webhook notifications
3. Secure document storage
4. Role-based access

6. User Flow

Vendor Flow

1. Login via OTP
2. Upload documents
3. System verifies documents
4. Profile becomes reusable
5. Share profile link

Platform Flow

1. Login to dashboard
2. View vendors
3. Approve/reject
4. Integrate via API

7. Technical Requirements

1. Frontend: React / Next.js
2. Backend: Node.js
3. Database: PostgreSQL
4. Storage: AWS S3
5. Authentication: OTP-based
6. APIs: GST, PAN, Bank verification

8. Security Requirements

1. Encrypted document storage
2. HTTPS everywhere
3. Role-based access control
4. Audit logs
5. Data privacy compliance

9. Monetization

1. Monthly SaaS fee
2. API usage pricing
3. Verification charges
4. White-label setup

10. KPIs

1. Onboarding time reduction
2. Vendor completion rate
3. Platform adoption rate
4. Monthly recurring revenue

11. Roadmap

1. Phase 1: MVP (manual verification)
2. Phase 2: API integrations
3. Phase 3: ONDC integration & credit scoring
